Comments to the Author

The paper presents a cutting technique to realize a small RLSA antenna. However, the paper is not written and organized in a clear, precise manner, hence it is difficult to follow. Please correct the caption of Figure 6. Besides, please check the grammatical errors carefully. The authors should provide a comparison between the presented antenna with small RLSA antennas in the literature.

Reviewer: 2

Comments to the Author

This paper proposes a cutting technique for constructing small RLSA antennas with low reflection.

The detailed comments are as follows.

1. The authors should explain clearly why the gain of the proposed cutting RLSA antenna is higher than the conventional RLSA antenna.
2. Please check the captions of Figure 2.
3. What does each line represent in Figure 6?
4. Please check the captions of Figure 6.
